BG6UL
6 Inch Bench Grinder
Assembly & Operating Instructions

READ ALL INSTRUCTIONS AND WARNINGS BEFORE USING THIS PRODUCT.

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE.
This manual provides important information on proper operation and maintenance. Every effort has been made to ensure the accuracy of this manual. We reserve the right to change this product at any time without prior notice.

STOP! DO NOT RETURN THIS PRODUCT TO THE RETAILER.

Questions? Problems? CONTACT CUSTOMER SERVICE.
If you experience a problem or need parts for this product, visit our website http://www.buffalotools.com or call our customer help line at 1-888-287-6981, Monday-Friday, 8 AM - 4 PM Central Time. A copy of the sales receipt is required.

CALIFORNIA PROPOSITION 65

WARNING: You can create dust when you cut, sand, drill or grind materials such as wood, paint, metal, concrete, cement, or other masonry. This dust often contains chemicals known to cause cancer, birth defects, or other reproductive harm. Wear protective gear.

WARNING: This product or its power cord may contain chemicals, including lead, known to the State of California to cause cancer and birth defects or other reproductive harm. Wash hands after handling.

What You Need to Know About Safety Instructions

Warning and Important Safety Instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur. Common sense, caution and care must be exercised when assembling or using this product.

Always contact your dealer, distributor, service agent or manufacturer about problems or conditions you do not understand.

⚠️ WARNING ⚠️ This is a safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

⚠️ CAUTION ⚠️ This is a safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.
GENERAL PRODUCT SPECIFICATIONS

FEATURES:
- 120V / 60 Hz
- 1/2 HP Peak
- 1.5 AMP
- Bore 1/2 Inch
- Wheel Size - 6 inch x 5/8 inch
- Two Wheels: 36 Grit & 60 Grit

SPECIFICATIONS
- Rated Current: 1.5 AMP
- Rated Voltage: 120V / 60 Hz
- No Load Speed: 3,560 RPM

KEEP THIS MANUAL, SALES RECEIPT & APPLICABLE WARRANTY FOR FUTURE REFERENCE. READ ALL INSTRUCTIONS AND WARNINGS BEFORE USING THIS PRODUCT. When unpacking, check to make sure all parts listed are included. If any parts are missing or broken, please call Customer Service at 1-888-287-6981.

FOR CONSUMER USE ONLY – NOT FOR PROFESSIONAL USE
IMPORTANT SAFETY RULES

COMMON SENSE AND CAUTION ARE FACTORS WHICH CANNOT BE BUILT INTO ANY PRODUCT. THESE FACTORS MUST BE SUPPLIED BY THE OPERATOR.

WARNING

Keep your work area clean and well lit. Cluttered work benches and dark work areas may cause accidents or injury.

Do not operate power tools in explosive areas, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

Keep bystanders, children and visitors away while operating a power tool. Distractions can cause you to lose control.

WARNING

Double insulated tools are equipped with a polarized plug (one blade is wider than the other.) This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install a polarized outlet. Do not change the plug in any way. Double insulation eliminates the need for the three wire grounded power cord and grounded power supply system.

Avoid body contact with grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is grounded.

Do not abuse the cord. Never use the cord to carry the tool or pull the plug from an outlet. Keep the cord away from heat, oil, sharp edges, or moving parts. Replace damaged cords immediately. Damaged cords increase the risk of electric shock.

When operating the tool outside, use an outdoor extension cord marked “WA” or “W.” These cords are rated for outdoor use and reduce the risk of electric shock. Make sure the extension cord being used is in good condition. If there are any cuts or nicks (no matter how deep) in the insulation, DO NOT use that cord. Also, make sure the extension cord is heavy enough to carry the current needed. DO NOT use small “around-the-house” lamp extension cords. These cords can easily overheat and/or catch fire when used with power tools.

CAUTION

Do not force tool. Use the correct tool for your application. The correct tool will do the job better and safer at the rate for which it is designed.

Do not use the tool if the power switch does not turn it “ON” or “OFF”. Any tool that cannot be controlled with the switch is dangerous and must be repaired.

Disconnect the power cord plug from the power source before making any adjustments, changing accessories or storing the tool. Such preventive safety measures reduce the risk of starting the tool accidentally.

Store idle tools out of reach of children and other untrained persons. Tools are dangerous in the hands of untrained users.

DANGER

People with pacemakers or other electronic devices should consult with a physician before operating this product. Interruption or failure of the pacemaker could occur when electrical equipment is operated within close proximity of electrical devices.
**WARNING**
Wash hands after handling the power cord. Touching the power cord could expose you to lead, which is known in the State of California to cause cancer, birth defects and other reproductive harm.

**WARNING**
All work areas should be clean and well lit. Accidents are more likely to occur in poorly lit and cluttered areas.

**WARNING**
Keep children, and other distractions at a distance while operating power tools.

**WARNING**
Keep the power cord in good condition, and replace damaged cords immediately. Do not use the cord to pull the plug from the outlet. Keep the cord away from materials and surfaces that could damage cords. The risk of electric shock increases when the power cord is damaged.

**WARNING**
Always use the appropriate extension cord, making sure it is rated for use with power tools. Always be sure the extension cords are in good condition, free of cuts or nicks in the insulation. If using the power tool in an outside area with an extension cord, make sure the cord is rated for outdoor use.

**WARNING**
Do not make contact with a grounded surface while using this power tool. Contact with surfaces like pipes, radiators or major appliances increases your risk of electric shock.

**WARNING**
Use common sense while operating this power tool.
Do not use this tool if you are:
- Feeling tired or are under the influence of alcohol or drugs.
- Wearing loose clothing or jewelry. Keep long hair pulled back and away from moving parts.
- Overreaching or have improper footing. Handling the tool in this way could cause serious injury.

When using this power tool always:
- Wear the proper safety equipment, such as safety goggles, dust masks, non-slip shoes, etc.
- Check to be sure all adjusting keys or wrenches have been removed before starting the power tool.
- Check to be sure the power switch is in the “OFF” position before plugging the power tool into an electrical outlet.

**CAUTION**
Follow these steps to maintain safe working conditions and good working condition of power tools.
Improper care can result in electric shock or serious injury.
- Secure and support the work piece using clamps. **Do not use your hands to hold the piece in place.**
- **Use the correct tool for the job.** Using the correct tool is safer and faster.
- Make sure the power switch is in good working order. If the power switch no longer turns the tool “ON” or “OFF”, discontinue use, and have the tool replaced or repaired.
- Remove the power cord from the power source before storage, changing accessories, or moving the tool.
- Keep out of reach of children, or any untrained person. Store tools in a safe and dry place.
- Keep tools clean, and cutting tools sharp. Maintaining tools with proper care will increase the life of the power tool, and reduce the risk of injury.
- Check to be sure all moving parts are free from binding and are properly aligned.
- Use only accessories that are recommended by the manufacturer for your tool model.

**WARNING**
Safety glasses and ear protection must be worn during operation.
SERVICE

Tool service must be performed only by qualified repair personnel. Service or maintenance by unqualified personnel could result in a risk of injury.

When servicing a tool, use only identical replacement parts and follow instructions in the manual. Use of unauthorized parts or failure to follow Maintenance Instructions may create a risk of shock or injury.

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE.
This manual contains important information regarding safety, operation, maintenance and storage of this product. Before use, read carefully and understand all warnings, cautions, instructions and labels. Failure to do so could result in serious personal injury, property damage or even death.

IMPORTANT SAFETY INSTRUCTIONS

Before using this tool, you need to become familiar with its operation. If you are unsure about the operation of the tool, or have any questions about its proper use, call the Customer Service Department at 1-888-287-6981. Follow these instructions for safe handling of the tool:

- Always secure and support the work piece using clamps. Do not use your hands to hold the piece in place.
- Be sure your work area is clean and secure before turning the power switch into the “ON” position. Be sure the area is free from all foreign material, nails, staples, or any other material.
- Turn the tool “OFF” and unplug from the power source before making any changes or adjustments to the saw blade.
- Do not use solvents containing carbon tetrachloride, ammonia or acetone to clean the saw. Never use gasoline, paint thinner, or other caustic chemicals that can damage the plastic parts of the tool.
- Always use the appropriate safety gear when operating this saw. Including but not limited, to goggles, dust mask or respirator. Always work in a well-ventilated area to reduce your exposure to harmful chemicals and dust particles.
- Keep hands away from the cutting area.
- Do not reach under the work piece.

PACKAGE CONTENTS

• Bench Grinder
• 2 Grinding Wheels (One Course and One Medium)
• 2 Tool Rests
• 2 Eye Shields

COMPONENTS

1) Eye Shield
2) Power Button
3) Eye Shield Adjustment
4) Wheel Guard
5) Tool Rest
6) Tool Rest Adjustment
7) Mounting Holes
8) Bench Grinder
9) Grinding Wheel
ASSEMBLY

INSTALLING/REPLACING GRINDING WHEELS, TOOL RESTS, EYESHIELDS

**WARNING**
Always use the proper grinding wheels for the bench grinder. Grinding wheels that do not properly fit will cause loss of control.

**WARNING**
Before installing or replacing the grinding wheels, make sure the power cord is unplugged. Failure to do so could result in serious injury or electric shock.

**NOTE**
Unpack product from package and review contents. Keep all packaging until product has been reviewed.

1. Double check that the bench grinder is off and unplugged from a power source before attempting to install or remove the grinding wheel(s). Follow the illustrations to remove/install the Eye Shield and attach/remove it from the Bench Grinder. Be certain to use the bolts and washers as indicated.

2. There is a left and right tool rest. When in actual use, the tool rests should be adjusted to within 1/8” (3.2mm) of the grinding wheel or other accessory being used. Follow the illustrations to remove/install the tool rest. The Grinding Wheel is accessed by removing the Eye Shield and Tool Rest and the Wheel Guard.

3. While the Grinding Wheel is removed, clear any debris from the inner flange. Then install the new Grinding Wheel, the arbor screw, washer and outer flange.

4. Check that the Grinding Wheel rotates easily and fully, and is securely held in place after replacing the arbor screw and outer flange.

Note: You may choose to fasten the Bench Grinder to a secure base. The base includes pre-drilled holes to attach 5/16” bolts to a secure surface.
OPERATION

⚠️ CAUTION
Wear safety eyewear and dust filters or respirators while using this tool.

⚠️ WARNING
Keep hands and fingers away from the rotating Grinding Wheel while it is in operation. Your fingers can get stuck inside the rotating wheel and cause serious injury to the user.

Keep a steady pressure on the workpiece. Keep it moving at an even pace for smooth grinding. Press too hard and it will overheat the motor. Note the original bevel angle on the item to be sharpened, and try to maintain the shape. The grinding wheel should rotate into the object being sharpened. Keep a tray filled with water and dip your work into it regularly to prevent overheating.

MAINTENANCE

⚠️ WARNING
Disconnect the power supply before cleaning. Wear safety eyewear before cleaning. Use compressed dry air to blow off dust and debris. Use a soft bristle brush if compressed air is not available.

⚠️ CAUTION
Applying excessive force to the tool can overload the motor, decrease the life and increase the wear on the tool.

⚠️ CAUTION
Some chemicals can damage the product. Do not use harsh chemicals such as gasoline, carbon tetrachloride, paint thinner, etc.

⚠️ CAUTION
A qualified repair technician must perform any tool service or repair. Service or maintenance performed by unqualified personnel could result in injury. Use only identical replacement parts. Use of unauthorized parts or failure to follow maintenance instructions may create a risk of electric shock or injury.

⚠️ WARNING
Do not make contact with a grounded surface while using this power tool. Contact with surfaces like pipes, radiators or major appliances increase your risk of electric shock.

Keep construction debris out of vents and power button by blowing with compressed air. If compressed air is unavailable, use a soft bristle shop brush.

Use only mild soap and a slightly damp cloth to clean the tool.

ACCESSORIES

Use only accessories that are recommended by the manufacturer for your model. Accessories that may be suitable for one tool may become hazardous when used on another tool.

Always attach grounded (3-prong) extension cords to grounded (3-prong) outlets.

If you must use an extension cord, be sure that the gauge is large enough to carry the amount of current necessary for your power tool. If not, your tool may experience a loss of power, excessive voltage drop or overheating. For example, the smaller the gauge number, the heavier the cord.

The Bench Grinder will accept most polishing and buffing wheels, sold separately.
