### RECOGNIZE SAFETY SYMBOLS, WORDS AND LABELS

**What You Need to Know About Safety Instructions**

Warning and Important Safety Instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur. Common sense, caution and care must be exercised when assembling or using this product.

Always contact your dealer, distributor, service agent or manufacturer about problems or conditions you do not understand.

**WARNING** This is a safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

**CAUTION** This is a safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.
GENERAL PRODUCT SPECIFICATIONS

FEATURES:
• 36 Inch Metal Brake
• Includes Stand
• Bends Mild Steel As Thick As 12 Gauge
• Bends Stainless Steel As Thick As 16 Gauge

SPECIFICATIONS
• Bending Angle Range 0-120°
• Easily Bolts To Workbench

KEEP THIS MANUAL, SALES RECEIPT & APPLICABLE WARRANTY FOR FUTURE REFERENCE.

READ ALL INSTRUCTIONS AND WARNINGS BEFORE USING THIS PRODUCT.

When unpacking, check to make sure all parts listed are included. If any parts are missing or broken, please call Customer Service at 1-888-287-6981.

FOR CONSUMER USE ONLY – NOT FOR PROFESSIONAL USE
IMPORTANT SAFETY RULES

COMMON SENSE AND CAUTION ARE FACTORS WHICH CANNOT BE BUILT INTO ANY PRODUCT. THESE FACTORS MUST BE SUPPLIED BY THE OPERATOR.

Keep your work area clean and well lit. Cluttered work benches and dark work areas may cause accidents or injury.

Keep bystanders, children and visitors away while operating the metal bender. Distractions can cause you to lose control.

Do not force tool. Use the correct tool for your application. The correct tool will do the job better and safer at the rate for which it is designed.

Store idle tools out of reach of children and other untrained persons. Tools are dangerous in the hands of untrained users.

Use common sense while operating this metal bender. Do not use this tool if you are:
- Feeling tired or are under the influence of alcohol or drugs.
- Wearing loose clothing or jewelry. Keep long hair pulled back and away from moving parts.
- Overreaching or have improper footing. Handling the tool in this way could cause serious injury.
- Wear the proper safety equipment, such as safety goggles, dust masks, non-skid shoes, etc.
- Check to be sure all adjusting keys or wrenches have been removed before use.

Safety glasses and ear protection must be worn during operation.

SERVICE

Tool service must be performed only by qualified repair personnel. Service or maintenance by unqualified personnel could result in a risk of injury.

When servicing a tool, use only identical replacement parts and follow instructions in the manual. Use of unauthorized parts or failure to follow Maintenance Instructions may create a risk of shock or injury.

SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE.
This manual contains important information regarding safety, operation, maintenance and storage of this product. Before use, read carefully and understand all warnings, cautions, instructions and labels. Failure to do so could result in serious personal injury, property damage or even death.
IMPORTANT SAFETY INSTRUCTIONS

WARNING

Before using this tool, you need to become familiar with its operation. If you are unsure about the operation of the tool, or have any questions about its proper use, call the Customer Service Department at 1-888-287-6981. Follow these instructions for safe handling of the tool:

- **Be sure your work area is clean and secure.** Be sure the area is free from all foreign material, nails, staples, or any other material.
- **Always use the appropriate safety gear when operating.** Including but not limited to, goggles, dust mask or respirator.

PACKAGE CONTENTS

- Metal Brake
- Stand

COMPONENTS

1. Upper Handles
2. Body
3. Press Plate Assembly
4. Lower Handles
5. Mounting Foot
6. Mounting Holes
7. Stand
ASSEMBLY

 WARNING
The Brake is VERY heavy and requires that two people assist with assembly and installation.

1. Put the brake on the floor and position the mounting feet facing forward.
2. Put the left brake stand mounting pad facing against the left mounting foot. Assemble with the bolt, washer and nut and tighten securely.
3. Put the right brake stand mounting pad facing against the right mounting foot. Assemble with the bolt, washer and nut and tighten securely.
4. With the help of two people, lift the Brake and Stand upright.
5. Put the Brake and Stand where it will be mounted to the floor and mark through the holes on the left and right side.

 WARNING: Make sure that you will not be drilling through electrical conduit or water pipes, before drilling the mounting holes.
6. Drill holes to the floor. Secure the brake with bolts, lock washers, & nuts (not included).

OPERATION

 CAUTION
Do not bend stock that is thicker than 12 gauge. You will damage the Brake. Measure the thickness before use. During bending, keep both hands on the lower handles.

Lift up the Handles to open the Press Plate Assembly. Insert sheet metal that you want to bend over the Body and under the upper Press Plate Assembly. Slide sheet metal and align the bend marks on the metal to the inner lip of the Body.

Press down on both Handles to the locked position. This will cause the upper Press Plate Assembly to clamp down on the stock. If the Handle does not come down all the way and lock, either the stock is greater than 12 gauge, or the Brake needs to be adjusted to allow for a thicker stock.

Using both hands, lift up on the Body using its lower Handles until the desired angle is reached on the stock. Once bend is complete, return lower Handles to down position. Lift the upper Eccentric Handles all the way up and remove the sheet metal.

MAKING ADJUSTMENTS
You may need to adjust the position of the Press Plate Assembly to allow for thicker or thinner pieces of sheet metal, or to align it to the Body.

Adjust for Thickness of Sheet Metal
Lift the upper handles all the way up and loosen nuts to allow the bolt to move up or down. Using an open end wrench, turn the bolt clockwise and move the Press Plate Assembly down, or counterclockwise to move it up (for large stock). Determine the number of turns, then tighten the nuts to secure the bolt. Repeat on opposite side.
Adjust bolt with the same number of turns. Press Plate Assembly must be flush with the body when closed. If one side is not flush, readjust that side.

**Align the Press Plate Assembly In or Out**
Lift both upper Handles. Loosen the bolts on each side. Nudge each side of the press plate assembly in or out. This will determine the roundness of the bend. The farther back the press plate assembly, the rounder the bend. A typical setting should be between 1/16 to 1/8 inch behind the inner edge of the Body.

**MAINTENANCE**

⚠️ **WARNING**
Always use caution when moving or handling the metal brake.

Lubricate all moving parts periodically. Use a light oil.

### PARTS LIST

1. Handle cover 4
2. Left crank handle 1
3. Washer 2
4. Left eccentric bushing 1
5. Nut M10 2
6. Connecting shaft 2
7. Nut M10-turn Left 2
8. Lock nut M16 2
9. Square steel holder 2
10. Lock nut M12 6
11. Washer 12 10
12. Bolt M12X35 6
13. Shaft 2
14. Right bracket plate 1
15. Washer 16 4
16. Bolt M16X35 2
17. Upper press plate 1
18. Bending leaf 1
19. Leg for stand 2
20. Level plate for stand 2
21. Frame 1
22. Turning shaft 2
23. Right eccentric bushing 1
24. Right crank handle 1
25. Washer 16 2
26. Pin 3 2
27. Left bracket plate 1
28. Bolt M12X25 4
29. Bolt M12X12 2
30. Nut M16 2
